Energy-efficient homelifts that reduce volume and maximize space
- ➔ **SAFETY AND COMFORT**
Our products ensure a safe and comfortable ride for all users
- ➔ **DESIGN**
Classy and elegant homelifts with refined shapes and materials

WHY CHOOSE THE GIOTTO ROUND HOMELIFT

Giotto line of round homelifts represents the elegance of curves for a luxury design and adapts perfectly to any need and any home environment.

The elegance of Giotto homelift enhances the architectural context in which it is installed and increases its value.

Ideal to be installed in a central position inside a round stairwell or freestanding, Giotto becomes the protagonist of the entire environment: a real piece of furniture.

It can operate in 2 different modes: hold to run in cabin and automatic at the floors, or automatic both in cabin and at the floors.

Perfect to amaze your guests, allowing them to move between the different floors of the house in an impressive panoramic homelift or to allow access to offices, museums, public places and prestigious yachts.

 *Made in Italy*
